

Flight Schools

Gold Seal is the New Standard for Ground Training

➤ Integrate Ground and Flight Training

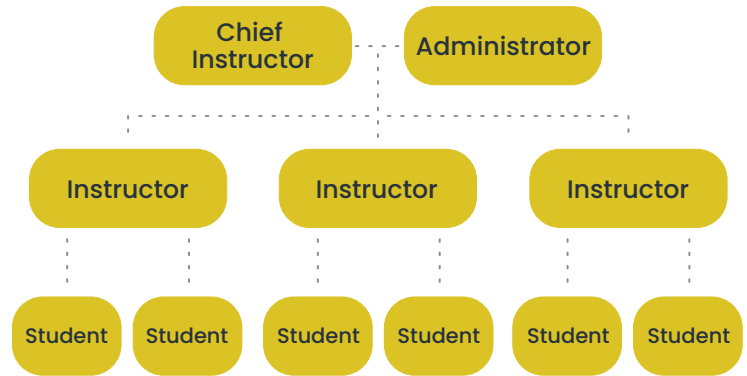

With Gold Seal, ground training supports flight training. It's not just for written test prep. The result is reduced workload for instructors and better prepared students.

Conceptual knowledge is transferred to students not just for Knowledge Test success, but for improved flight training performance.

➤ Manage Instructors

Gold Seal's hierarchical structure keeps administrators, chief instructors, and line instructors in sync. Communications are improved and problems are identified earlier.

This layered approach to learning management is only available with Gold Seal.

➤ Track Student Progress

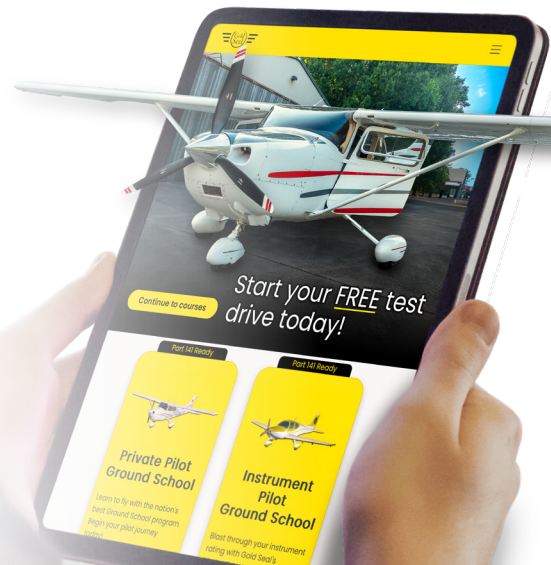

Student Progress monitoring ensures that nothing gets overlooked and eliminates surprises. Instructors discover and mitigate student deficiencies more quickly, and a built-in assignment function supports remedial study. Instructors can assign lessons with due dates and confirm their completion.

➤ Reports & Endorsements

Reporting for administrative analysis and FAA compliance are built right in. This is mission-critical in Part 141 programs. Gold Seal manages and generates Knowledge Test Endorsements and Completion Certificates automatically, removing this burden from instructors.

➤ Part 61 & Part 141

No special ground school versions needed! Gold Seal comes ready for either Part 61 or Part 141 environments. It's the perfect fit for every student.
